HOSPITAL MANAGEMENT SYSTEM

Global HMS⁺ is a web based Hospital Management System for small / medium sized Healthcare Setups. It packs a variety of modules intended for performing day-to-day operations in a hospital.

Asmi Global Softwares_(opc) Pvt. Ltd.

Recent Backup : 08-08-2018 10:51 AM

WHY CHOOSE HMS⁺

HMS⁺ is a completely web-based Hospital Management solution developed to serve daily OPD / IPD service nomenclature of a Hospital / Clinic. It is fully platform independent and supports auto scheduling of SMS and E-mails. It also provides high ROI, has in-built accounting, user defined customizable formats for printing (billing/prescription/labels/barcode) using uniquely developed editor. It also acquires the facility of performing both uni-directional and bi-directional interfacing with nearly all types of bio-chemistry analyzers available in the market for auto-fetching of pathology reports into the application and later on publishing it. HMS⁺ also imposes robust front-end and back-end security measures thereby securing client data and transactions.

KEY BENIFITS

- SQL Server at Backend for Managing Database.
- Application is Fast, Reliable & Secure (In-built Security Features).
- Application is Able to Achieve 90% Paperless Work.
- Fully Developed as per NABH / NABL / MCI Compliance.
- Completely Responsive Designs makes it easier to operate on Variety of Devices.
- Easy to Use - Single Screen Performs Multiple Operations.
